**ABSENTEEISM AND ACADEMIC PERFORMANCE OF SECONDARY SCHOOLS:  
A CASE STUDY OF BUDONDO SUB COUNTY JINJA DISTRICT UGANDA.**

**BY**

**ISABIRYE DENIS**

**1162-07234-04713**

**A RESEACH REPORT SUBMITTED TO THE COLLEGE OF OPEN DISTANCE  
AND e-LEARNING IN PARTIAL FULFILLMENT OF THE REQUIREMENTS  
FOR THE AWARD OF THE DEGREE OF BACHELOR OF ARTS WITH  
EDUCATION OF KAMPALA INTERNATIONAL UNIVERSITY**

**MAY 2019**

## DECLARATION

I, **Isabirye Denis** declare that this report is by my hard work hence it has never been submitted for this award herein or any other institution of higher education.

Sign: 

**ISABIRYE DENIS**

Date: 24<sup>th</sup> / 02 / 2019

## APPROVAL

This is to certify that this research work was supervised and is now ready for submission to the academic board for consideration and approval.

Sign:  \_\_\_\_\_

MR. LAAKI SAMSON

Date: 28<sup>th</sup> Feb, 2019

## DEDICATION

I dedicate this work to my beloved parents Mr. Waziiko Francis and Ms Nakibule Josephine, Ms Waziiko Gertrud My siblings Justine, Jennipher, Gladys, Fred, Joseph and Ludigo. I also dedicate this piece of work to my friends, Mutesi Rebecca, Lyaga and Taabu Mbabali, Annamary who assisted me with reference materials and also encouragement.

## ACKNOWLEDGMENTS

I thank my fellow colleagues for the assistance they gave me in getting some information.

I also thank my Lecturers especially my supervisor Mr Alake Samson, Mr. Baluku, Ms Gwokyalya and Ms Shida for giving me easy time and guidance throughout the completion of this research. I further give my thanks to KIU fraternity for the encouragement and wisdom.

## ABSTRACT

This research is about the effect of absenteeism on academic performance. It was guided by three objectives; To find the attitudes towards Budondo Sub-county schools in Jinja Uganda. To find out the methods used for the retention of Secondary schools learners. To identify the role of teachers in children's performance in Bundondo Schools..

Purposive and stratified sampling was used to select a population of 40 respondents to represent a population of Buyala primary school.

# CHAPTER ONE

## INTRODUCTION

### **1.0 Background**

Parents and care givers play vital role of ensuring that the learners are encouraged to attend regularly. Siblings also have a part to play as being good role models by attending school regularly to serve as a motivation for the young ones. The learners also need to be handled by trained and qualified teachers. One who is equipped with various techniques and knowledge of using appropriate learning/teaching aids. One who is fully knowledgeable in the handling of the tender learners.

Absenteeism is a habitual pattern of absence from a duty or obligation. Traditionally, absenteeism has been viewed as an indicator of poor individual performance, as well as a breach of an implicit contract between employee and employer, it was seen as a management problem, and framed in economic or quasi-economic terms More recent scholarship seeks to understand absenteeism as an indicator of psychological, medical, or social adjustment to work.

### **1.1 Statement of the Problem**

The researcher targeted to come up with findings as to why there is a big disparity in performance for the regular attendants and the irregular attendants in primary schools as may be indicated in the randomly sampled schools. He intended to get findings to suggest whether the absenteeism in the Primary schools could have contributed to the kind of performance experienced by the sampled schools.

## **1.2 Objectives of the Study**

### **1.2.1 General Objective of the Study**

To find out the effect of absenteeism in the academic performance at Secondary schools level. The study will further indicate and suggest the ways out of this problem.

### **1.2.2 Specific Objectives of the Study**

- i. To find the people's attitudes towards Secondary schools in Budondo schools.
- ii. To find out the methods used for the retention of secondary schools learners.
- iii. To identify the role of teachers in children's performance in Budondo.

## **1.3 Research Questions**

- i. What are the attitudes of respondents towards Secondary schools in Budondo schools.
- ii. What are the methods used for the retention of Secondary schools in Budondo schools.
- iii. What are the roles of teachers in children's performance in Secondary schools in Budondo schools.

## **1.4 Scope of the Study**

This study was about the effect of absenteeism of academic performance. It was carried out in Secondary schools in Budondo school between August 2018 and May 2019.

### **1.5 Significance of the Study**

The research findings and recommendations will be important to the educators, managers, School Management Committees and parents in controlling absenteeism in the Secondary schools in Budondo schools. classes which result into poor performance.

It will be significant in opening up new avenues for policy makers and Non - Governmental Organizations having interest in the child's learning.

Research methods, techniques and instruments established in the current study may be relevant in the future studies targeting other curriculum areas of early childhood education.

The parents who are key players in education of the children will be well informed and sensitized on their roles towards achieving the goal of reducing the gap of absenteeism.

The study will help the research to fulfill the partial requirements for the award of Bachelor of Education Degree of Kampala International University.

## CHAPTER TWO

### LITERATURE REVIEW

#### **2.0 Introduction**

This chapter contains related literature on the topic being studied. The review is concerned with the effect of absenteeism on academic performance in the lower primary schools classes. The chapter highlights on what other writers have discovered to be the causes of absenteeism in primary schools and how it can be controlled.

Research focuses on the effect of absenteeism on academic performance in the ECPE classes. Absenteeism makes learners remain behind the syllabuses thus affecting performance. Lack of close supervision can also be a contributing factor to the poor academic performance.

According to the MoEST (May 2003) document - "Every Child in School," effective teachers must be trained. According to the Uganda Education Sector Support Programme (USSP) manual (July, 2005), 56% ECPE untrained teachers in public schools are causing negative Effect. The Ministry of Education Strategic Plan (2005- 2010) clearly identifies that majority of the teachers have not been trained to the Centre of Education (NACECE, 1999) recommends that teachers be trained for effective delivery of content.

#### **2.1 Attitude towards Primary Schools**

##### **2.1.1 Negative attitude on the teachers' part**

###### **Poor payment or total lack of payment**

This may happen when the government is lacking money to pay the teachers or the school under pays the staff. According to Piaget (1896-1980) children develop in stages i.e. sensory motor stage 0-2years pre-operational stage 2-7years, concrete operational stage 7-11years and formal operational 12- above. Each of these stages requires a child to perform activities

according to his/her stage. Most of the teachers who are poorly paid do not give knowledge and therefore the children are not developed holistically. According to Fontana (1981) how a child develops depends on the people around him. A child learns skills values needed for social living i.e. knowing the difference between right and wrong. The researcher supports Fontana and urges the adults to ensure that the child is reared in a good environment so that the right values are instilled in a child.

#### **Lack of recognition of the Secondary schools teachers by other stakeholders**

There are some stakeholders who are good at not recognizing the good work done by the teachers and because of these, teachers don't pay attention to the needs of the children hence affecting their academic performance.

#### **Discrimination of various forms by the head teachers**

Discrimination is any situation in which a group or individual is treated unfavorably based on prejudice, usually against their membership of a socially distinct group or category. Such categories include ethnicity, sex, sexual orientation, religion, socioeconomic status, age, and disability. Discrimination applying to the equal availability of employment opportunities, housing, and goods and services is widely legislated against.

#### **Poor and inadequate provision of teaching/learning resources**

Government allocations for education are low, On the three islands that make tin Comoros, over half of the population live in poverty and can contribute little to their children's education.

#### **Handling huge and unmanageable number of learners by a single teacher**

A class may be too big for one teacher to handle and this affects the performance of the children in that, most of them do not participate in class.

### **2.1.2 Negative attitude on the learners' part**

Improper transition between home and school (Standard Newspaper Education pull-out 2<sup>nd</sup> May, 2007)

#### **Poor Teaching methods**

Poor teaching methods and approaches (Uganda Ministry of education strategic plan 2005-2010 of July, 2005, that 56% of the public Secondary Schools are handled by some untrained teachers whose methods are poor, hence negative Effect on the learners).

#### **Lack of feeding programmers in Secondary schools**

Children's academic performance is affected by not having lunch or break at school. Many pupils drop out of school due to the fact that they don't get lunch at school as we know that nothing can take place when one is hungry. Many schools don't give children lunch. This was witnessed in some schools, that is to say those which do not provide lunch perform poorly compared to those providing lunch and when parents were interviewed about this, they responded that they prefer schools with ability of providing lunch.

#### **Use of corporal and other forms of punishment**

Many school-on-going children drop out of school due to heavy punishments which are given at school. For example you may find a child who has been given a punishment of digging up an anti hill and what is expected from that child is his/her performance dropping.

### **Unconducive learning environment**

Sanitation is defined as matters and methods connected with maintenance of public health. Poor sanitation may lead to children's performance dropping as they feel that they can not be in a poor environment thus absenteeism from school

### **Long distance between Home and School**

Some schools are far apart from their homes. You may find that a school is about seven miles from where they are staying. Some children are lazy and they can't move those long distances hence end up by dropping out of school.

## **2.2 Teaching Methods**

The teacher should vary his or her teaching methods. Learners learn better through play experimentation, discovery and exploration within the environment in which they are growing. The teacher and parents should encourage them in doing the above.

According to Julia Gitobu (1995) 'Principles and Practices of Home Management Play,' perform an attractive role of encouraging the learners to attend school regularly thus resulting in good coverage of the scheduled work, hence good performance.

Uganda Ministry of education Strategic Plan (2006-2012) identifies that lack of motivating methods contribute to absenteeism and need to be addressed adequately by having the lower primary schools teachers trained.

### **2.2.1 Teaching /Learning Resources**

Learners learn better in an environment that is rich with teaching/learning resources. Therefore teachers and parents are encouraged to provide a variety of the same (G.P. Oluoch, 1995).

Ministry of Education Science and Technology (MoEST -Uganda) Every Child in School- ensure learners have appropriate learning materials to retain them in school.

Teachers use locally available teaching/learning materials to stimulate the learners thus controlling absenteeism of the learners who may not wish to miss attending school.

According to Uganda Ministry of education strategic plan (2005-2012), lack of motivating methods and approaches and appropriate teaching/learning resources is also a factor that has increased absenteeism in Primary schools, hence poor academic performance.

### **2.2.2 Quality of Manpower**

A teacher handling a lower primary school, class should be trained and qualified. He/she should not impose his or her wishes on unprepared young ones. ‘Jean Jacques Rousseau’ (1712-1778) ‘Participation Training Project’ NACECE (1999) secondary school teachers have to be trained for effectiveness, hence high retention of learners thus good academic performance. Also ‘Every child at School’ by MoEST (2003) effective teachers must be trained.

### **2.3 Role of teachers on the Academic Performance**

The Secondary schools teacher can assist the children to learn comfortably by being loving, warm and naturant, building positive self esteem and confidence in children. The Secondary teacher should use child centered methods According to NACECE (1999) the teacher should use practical approach/child centered methods. The teacher should provide more activities for the children and the children should be active participants in learning. The secondary schools teacher should use plenty of teaching/learning aids to enable children master what they have learnt

According to Piaget (1896-1980) children who are at concrete operational stage should be given a lot of materials to help them acquire various skills. The secondary schools teacher should respect and acknowledge each individual differences in children, motivate each child to achieve at his/her own level of ability. The teacher to understand the children well, know their talents and potentials.

The teacher promotes desirable health and hygienic habits, nutritious meals and snacks, transmit desirable habits, values, attitudes and norms, Kuslan (1980) calls for understanding of child development by lower primary schools teachers. The teacher plans activities which encourage the child to touch, taste, smell, hear and see i.e. uses senses.

According to Montessori (1870-1972) children should be guided to discover and explore using their senses. The teacher sets the learning environment (classroom) so as to stimulate child's interest and motivates him/her to explore the world around her/him. According to Erickson's theory if the children's learning environment is unfriendly and unstimulating the child learns to mistrust and withdraws. The positive experiences develop in a child a good self concept and a feeling of self esteem According to Said et al (1972) the task of the schools teacher is enormous. He/she is everything for the child at school children demand love, attention, assistance, guidance and comfort from him.

Lilie (1975) defines a teacher as an instructional expert and stage setter. Since the teacher plays a fundamental role to assist and enable children from varied child rearing categories to learn comfortably and be successful in life, it is the researcher's appeal to the government to appreciate and pay this schools teacher some good salary so as to enable him/her implements her roles comfortably and happily.

## **CHAPTER THREE**

### **METHODOLOGY**

#### **3.0 Introduction**

Here the researcher elaborated step by step of the research design and methodology used to conduct his or her research. The chapter also states clearly the population to be studied, the sample and the sampling procedure to be applied. Here the researcher states the sample frame, the sample size and the research instruments that were used to get the required information.

#### **3.1 Research Design**

A quantitative descriptive design was used because of the need to obtain detailed description of absenteeism on academic performance.

#### **3.2 Area and Population of the Study**

The area of study is Secondary schools in Budondo schools. and the study comprises three schools, ten school teachers, ten head teachers, ten parents, ten school children totaling to forty respondents.

#### **3.3 Sample Selection**

Purposively sampling and stratified sampling was used where by school children and Head teachers were purposively selected, and schools teachers, parents were selected by use of simple random sampling to represent the entire population of Secondary schools in Budondo schools.

### **3.4 Sample Size**

From the proposed study, 40 respondents were selected to represent the population of Matende p/s. These were as follows 10 lower schools teachers, 10 Headteachers, ten parents, ten schools children.

### **3.5 Data Collection Instruments**

In order to carry out this research effectively, different instruments were employed to collect all the data required. These included among others the following;

#### **3.5.1 Questionnaires**

Questionnaires were designed and were used to get primary data; where by respondents were required to answer the questions. All the respondents were given questionnaires.

#### **3.5.2 Structured Interview**

Structured interview was used to get or in collecting data and they were built on the Effect of absenteeism on academic performance in secondary schools.

#### **3.5.3 Focus Group Discussions**

Focus Group Discussions was used to answer opinion question like “how has been the performance of your children? What attitude do you have against secondary school teachers?” However, it was difficult to organize respondents for a meeting. This was solved by making appointments with the respondents.

### **3.6 Data Collection Methods**

Two methods of data collection were used and these are primary and secondary data collection methods.

### **3.6.1 Primary data collection method**

Data was got from the field by use of questionnaires, observation, and focused group discussion.

### **3.6.2 Secondary data sources**

Text books and other related works of outstanding scholars whether published, magazines, written data sources included published and unpublished documents, agency reports, newspaper articles, Internet sources and so forth were referred.

### **3.7 Procedures**

The study required the researcher to get a letter of introduction from COEDL Kampala International University which was presented to the various respondents then the researcher introduced himself and the purpose of the study. Guarantee and confidentiality was assured by not asking the respondents name and only those willing to participate would be given questionnaires.

### **3.8 Data Analysis**

Data was analyzed and computed using Microsoft Excel. The information will be summarized into percentages and frequencies.

### **3.9 Ethical Considerations**

The researcher got a letter of introduction from the institute of distance learning. This letter was then presented to the respondents who then drafted an agreement to enable the researcher to carry out the study.

### **3.10 Limitations**

The research study was faced by a number of problems and constraints and hence may not adequately meet the intended objectives to the required level.

Financial constraints have limited the researcher from having a thorough research process for instance; undertaking pretexts and piloting studies had to be foregone.

Again data collection and processing was done in bits because the researcher could not raise the required fund in lump some as he had to find himself.

Problem of distance between the researcher and his supervisor while in the field did impede proper continuous assessment of research, thus research process could only be dictated when it's already late.

The researcher faced a problem of time constraints. The time allocated for the study was not enough for a thorough investigation because the research was conducted with academic urgency in the two years while also the researcher was required to attend to his academic work.

The unwillingness of the respondents also posed a problem to the research study. However, the researcher tried his level best using various research skills and tactics to avoid the problems or at least to reduce their impact on the study.

### **3.11 Delimitations**

This research was facilitated by the following favorable factors:

Since the researcher was a resident of the area, he had accommodation hence less expenditure.

The researcher being a resident was familiar to the people whom he obtained information.

The researcher did not find problems in transport because the infrastructure was good.

## CHAPTER FOUR

### PRESENTATION, ANALYSIS AND DISCUSSION OF DATA

#### 4.0 Introduction

In this section, a core of the study is presented. Data collected from the respondents is analyzed. The discussion is presented in accordance with research questions and objectives of the study.

#### 4.1 Socio-demographic background of the Respondents

##### 4.1.1 Sex

**Table 1: Sex of the Respondents**

Sex	Frequencies	Percentages
Males	23	58
Females	17	42
<b>Total</b>	<b>40</b>	<b>100</b>

Source: Respondents

From table 1, it can be established that most of the respondents were males with 23 and the rest were females with 17.

##### 4.1.2 Age

**Table 2: Age of the Respondents**

Age	Frequency	Percentages
Below 34	18	45
35-44	15	38
45	7	17
<b>Total</b>	<b>40</b>	<b>100</b>

Source: Respondents

From the study it was found out that respondents below 34 years were more than with 45% followed by between 35 - 44 with 38% and last 45+ with 17%. Below 34 were more than as this included children.

### 4.1.3 Marital status

**Table 3: Marital status of the Respondents**

Marital Status	Frequencies	Percentages
Single	26	65
Married	9	22.5
Divorced	5	12.5
<b>Total</b>	<b>40</b>	<b>100</b>

Source: Fieldwork 2012

From the study, it was established that most of the respondents were single with 65% followed by married with 22.5% and divorced with 12.5%. Through the informal interview with the respondents, single were many because they fear commitment as they fresh graduates.

### 4.1.4 Education level

**Table 4: Education level of the Teachers**

Education level	Frequencies	Percentages
Diploma in education	16	40
Bachelors degree in education	4	60
Masters	0	0
<b>Total</b>	<b>20</b>	<b>100</b>

Source: Respondents

The results indicate that 40% of teachers have diplomas in education, 60% have degrees in primary education while 0% are masters holders.

Most of the teachers (40%) had diplomas in education. This was because people had a negative attitude and they did not see the need to invest in the early years of the child.

#### 4.1.5 Occupation

**Table 5: Occupation of the Respondents**

Occupation	Frequencies	Percentages
Farmers	23	57.5
Business proprietor	5	12.5
Civil servants	12	30
<b>Total</b>	<b>40</b>	<b>100</b>

Source: Fieldwork 2012

From the study it was found out that most of the respondents were farmers with 23 (57.5%) followed by civil servants with 12 (30%) and business proprietor last with 5 (12.5%). civil servants were many because it constitutes the teachers, doctors, and other professionals who are employed by the government.

#### 4.2 Attitudes towards secondary Schools

##### 4.2.1 Attitude of Parents towards the secondary Schools

**Table 6: Attitude of Parents towards the secondary Schools**

Attitude	Frequencies	Percentages
Positive	6	60
Very good	3	30
Negative	1	10
<b>Total</b>	<b>10</b>	<b>100</b>

Source: Fieldwork 2012

Table 6 indicates that parents have a positive attitude towards the education of their children with 60%, 30% have a very good attitude and 10% have a negative attitude towards education

of the children. Respondents had a negative attitude and they did not see that there is need to invest in the early years of the child.

#### 4.2.2 Attitude of Teachers towards Secondary Schools

**Table 7: Attitude of Teachers towards secondary class**

Attitude	Frequency	Percentages
Positive	4	40
Negative	6	60
<b>Total</b>	<b>10</b>	<b>100</b>

**Source:** Fieldwork 2012

From table 7, it can be established that most of the teachers have a negative attitude towards primary schools with 60% and the rest (40%) have a positive effect.

##### 4.2.2.1 Negative Attitude

**Table 8: Negative attitude of Teachers against secondary Classes**

Negative Attitude	Frequency	Percentages
Poor payment	2	20
Low recognition	1	10
Discrimination	5	50
Inadequate teaching practices	2	20
<b>Total</b>	<b>10</b>	<b>100</b>

**Source:** Respondents

Table 8 indicates that most of the teachers suffer from discrimination as it is shown by 50%. 20% were facing the problem of poor payment and inadequate provision of teaching materials and the rest are rarely recognized by other stakeholders.

#### 4.2.2.2 Negative attitudes on Learners

**Table 9: Negative attitudes on learners' part**

Attitude	Frequency	Percentages
Poor teaching methods	3	30
Punishments	1	10
Lack of feeding programmers	2	20
Poor sanitation	1	10
Long distances	3	30
<b>Total</b>	<b>10</b>	<b>100</b>

**Source:** Fieldwork 2012

Table 10 shows that poor teaching methods and long distances are the most negative attitudes of learners on primary classes with 30% each followed by lack of feeding programmes with 20%, punishments and poor sanitation with 10% each also.

#### 4.3 Methods used for the retention of secondary school learners

The study was done to find out whether the secondary teachers were using the practical methods that enabled the child to get the necessary skills, knowledge and values. Here both the teachers and head teachers were interviewed.

**Table 10: Methods used**

Method	Frequencies	Percentages
Child centered	18	90
Lecture	2	10
<b>Total</b>	<b>10</b>	<b>100</b>

**Source:** Respondents

From the table 90% of the secondary teachers used the child centered methods while 10% used lecture method. The 90% of the teachers who used the child-centered methods were trained and appreciated the importance of child-centered methods. Thus it reduces absenteeism hence good academic performance of the children.

#### 4.4 Roles of Teachers in children’s performance

**Table 11: Roles of Teachers in Children’s performance**

<b>Roles</b>	<b>Frequency</b>	<b>Percentages</b>
Encourage children to read	12	30
Prepare children for exams	10	25
Equip children with necessary materials	5	12.5
Helps children to pass exams	13	32.5
<b>Total</b>	<b>40</b>	<b>100</b>

**Source:** Fieldwork 2012

Table 11 shows that the major role of teachers is to help children pass their exams, followed by encouraging children to read, then by preparing them for equipping children with necessary materials with 32.5%, 30.0%, 25.0% and 12.5% respectively.

#### 4.5 Roles of Parents in Children’s performance

Through the internal interview with the parents, it was found out that parents have a role of making sure that the child go to school every day, feed the children, encourage them to do homework, buying scholastic materials and among others.

## 4.6 Absenteeism and Academic performance

### 4.6.1 Causes of Absenteeism

**Table 12: Causes of Absenteeism**

Causes	Frequency	Percentages
Weak administration	8	20
Child labor	12	30
Long distances	9	22.5
Punishment	3	7.5
Absenteeism of teachers	6	15
Orphanage	12	30
<b>Total</b>	<b>40</b>	<b>100</b>

**Source:** Respondents

From table 12, it can be established that the major cause of absenteeism is orphanage and child labor both with 30.0%, followed by long distances, weak administration, absenteeism of teachers, and punishments with 22.5%, 20%, 15%, and 7.5% respectively.

#### **Poor teaching methods**

Some teachers use poor teaching methods that may cause the children to absent themselves from school. They get bored when the teacher is teaching.

#### **Poor structures**

Structures for study include building, compound, among others. When these structures are in improper shape, many children are likely to absent themselves when it rains as they fear the falling of school structures.

#### **Long distances**

Many schools are located far away from homes where by children have to foot for 6km daily from Monday to Friday. This may lead to a child preferring to absent.

### Weak Administration

In some schools, the administration is weak in that they don't take roll-calls, they don't give light punishment to absentees, and this encourages children to absent themselves.

### Absenteeism of Teachers

You can't stop a child from being absent when teachers always absent themselves. This also encourages the children to absent themselves as they say that the young ones learn from older people.

### Punishments

Children are always entitled to heavy punishments and because of these punishments children decide not to come to school in order to dodge them.

## 4.6.2 Solutions

**Table 13: Solutions to the problems**

Solutions	Frequency	Percentages
Elimination of punishments	15	37.5
Establishment of more schools	14	35
Punish absent teachers	7	17.5
Proper teaching methods	4	10
<b>Total</b>	<b>40</b>	<b>100</b>

Source: Fieldwork 2012

From table 13, it can be indicated that the major solution to causes of absenteeism is elimination of punishments in school with 37.5%, followed by establishment of more schools, punishing absent teachers and proper teaching methods with 35% 17.5% and 10% respectively.

### **Elimination of punishments**

Heavy punishments or corporal punishments should be eliminated in schools so as to curb absenteeism. They should be substituted with light punishments like sweeping of the classroom for two days instead of caning.

### **Establishment of more schools**

More schools should be established so as to reduce on the long distances traveled by young pupils or children. At least more schools should be established in the . Punishing absent teachers

Teachers who are always absent without a standing reason should be penalized so as to reduce on their absenteeism.

### **Proper teaching methods**

Proper teaching methods should be introduced in schools. For example demonstrations should be practiced when teaching a practical subject so as to make the children like the subject. Once children like it they will not absent themselves from school.

#### **4.6.3 Performance of Absentees**

**Table 14: Performance of Absentees**

<b>Performance</b>	<b>Frequency</b>	<b>Percentages</b>
Excellent	0	0
Very good	2	5
Good	5	12.5
Bad	13	32.5
Very bad	20	50
<b>Total</b>	<b>40</b>	<b>100</b>

**Source:** Respondents

Table 14 shows that the performance of the majority of the absentees is very bad with 50% followed by bad, good and very good with 32.5%, 12.5% and 5% respectively. There is no one who responded as the performance is very excellent.

#### 4.6.4 Performance of those who are always present

**Table 15: Performance of children who are always present**

Performance	Frequencies	Percentage
Excellent	30	75
Very good	10	25
<b>Total</b>	<b>40</b>	<b>100</b>

**Source: Respondents**

Table 15 shows that the performance of children who are always present is excellent with 75% and the rest responded as the performance are very good.

#### 4.6.5 Relationship between Absenteeism and Academic Performance

**Table 16: Relationship between Absenteeism and Academic Performance**

Relationship	Frequencies	Percentage
Positive	27	67.5
Negative	13	32.5
<b>Total</b>	<b>40</b>	<b>100</b>

**Source: Respondents**

Table 16 indicates that there is a positive relationship between absenteeism and academic performance as it was represented by 67.5% and the rest 32.5% said that there is a negative relationship.

Through the informal interview with the respondents there is a positive relationship in that once a child is ever absent he or she is most likely to perform badly and vice versa.

## CHAPTER FIVE

### SUMMARY OF FINDINGS, RECOMMENDATIONS AND CONCLUSIONS

#### 5.0 Introduction

This chapter consists of the summary of the major findings, conclusion and recommendations.

#### 5.1 Summary

From the study it was established that most of the respondents were males with 23 and the rest were females with 17. Most of the respondents were single with 65% followed by married with 22.5% and divorced with 12.5% 60% were teachers with diplomas in education, 55% have degrees 30% while 0% are teachers without master, who were farmers with 23 (57.5%) followed by civil servants with 12 (30%) and business proprietor last with 5 (12.5%).

The study indicates that parents have a positive attitude towards secondary schools with 60%, 30% have a very good attitude and 10% have a negative attitude towards secondary class. Most of the teachers have a negative attitude towards education with 60% and the rest (40%) have a positive Effect, the negative attitude of teachers include discrimination, poor payment and inadequate provision of teaching materials and the rest are rarely recognized by other stakeholders.

From the study, 90% of the secondary teachers used the child centered methods while 10% used lecture method. The 90% of the teachers who used the child-centered methods were trained and appreciated the importance of child-centered methods.

The study indicates that most of the respondents gave the major role of the teacher as to help children pass their exams as it was given by 32.5%. This is followed by 30% who gave

encouraging children to read 25% said that preparing children for exams, followed by 12.5% gave equipping children with necessary materials.

It was established that the major cause of absenteeism is orphanage and child labour each with 30%, followed by long distances, weak administration, absenteeism of teachers, and punishments with 22.5%, 20%, 15%, and 7.5% respectively. The solutions to causes of absenteeism were found to be elimination of punishments in school with 37.5%, followed by establishment of more schools, punishing absent teachers and proper teaching methods with 35%, 17.5% and 10% respectively.

The performance of the majority of the absentees is very bad with 50% followed by bad, good and very good with 33%, 12% and 5% respectively. There is no one who responded as the performance is very excellent.

The performance of children who are always present is excellent with 75% and the rest responded as the performance is very good.

The study indicates that there is a positive relationship between absenteeism and academic performance as it was represented by 67.5% and the rest 32.5% said that there is a negative relationship.

## **5.2 Conclusions**

Through the study it was found out that there is a positive relationship between absenteeism and academic performance.

## **5.3 Recommendations**

Community sensitization on the effects HIV/AIDS which claims many parents and leave many children orphans. They should also discourage children from going to work in the sugarcane plantations to reduce child labor.

There was need to sensitize the community so that the highly academic achievers could be interested in teaching in the Primary schools.

Therefore the lower primary, teacher should ensure that there was a feeding programme in the school, sensitize the parents on the importance of providing basic needs to their children. The parents should provide the basic needs to the child. Despite the many socio economic activities parents should spare sometime for guiding and counseling their children. The secondary school teacher should appreciate his/her role in the development of the child, use variety of teaching/learning aids; child centered methods and creates a conducive learning environment for the child.

The Secondary school teacher should handle each child with love because of their varied environment i.e. the orphans, the gifted, the handicapped etc. Parents, teachers and the community should ensure that children's environment is socially acceptable i.e. free from drunkard people and any form of misconduct because children learn by observation and imitation.

## APPENDICES

### APPENDIX 1

#### QUESTIONNAIRES TO THE PARENTS, TEACHERS, HEAD-TEACHER AND LEARNERS

Dear Respondent,

I am a student of Kampala International University, in my final year. I am carrying out a research study on the topic; “Absenteeism and Academic Performance in Secondary schools in Budondo schools.”

The purpose of this study is to collect data on the topic. Your response will be treated with confidentiality and the information obtained is strictly for education purposes.

#### Instruction:

This section concerns you, please tick the most appropriate boxes of your choice and fill in the space provided

#### SECTION A: PERSONAL DATA

1. Sex: (a) Male  (b) Female
2. Age of the Respondent: (a) Below 34  (b) 35 -44  (c) 45+
3. Marital status: (a) Married  (b) Single  d) Divorced
4. Education background:
  - (a) Certificate in Education
  - (b) Diploma in Education
  - (c) Bachelors Degree in Education
  - (d) Masters
5. Occupation of the respondent

(a) Civil Servant

(b) Farmer

(c) Business Proprietor

**SECTION B: ATTITUDE TOWARDS EDUCATION**

6. What do you understand by the term Education?

.....  
.....

7. What is your occupation?

(a) Teacher

(b) Parent

(c) Parent representative

(d) Head teacher

8. Are your services as secondary school teacher being delivered as they are supposed to be?

(a) Yes  (b) No

9. (i) What is your attitude towards Secondary education?

(a) Positive  (b) Negative

(ii) If positive, then what

(a) Enough teaching materials

(b) Recognized

(c) Good remuneration

(iii) If negative, then tick the appropriate

(a) Poor payment

(b) Low recognition

(c) Discrimination

10. Negative attitudes by the learners

- (a) Poor teaching methods
- (b) Punishments
- (c) Lack of reading program
- (d) Long distances
- (e) Poor sanitation

**SECTION C: METHODS USED IN TEACHING**

11. Which method do you use during teaching?

- (a) Lecture
- (b) Child centred

12. Do children appreciate when teaching using that method mentioned?

- (a) Yes
- (b) No

If Yes, how? .....

If No, why? .....

13. What should be done to improve the academic performance?

.....  
.....

14. What is the role of the teacher?

- (a) Encourage children to read
- (b) Preparing children for exams
- (c) Equipping children with necessary materials
- (d) Helping children to pass exams

**SECTION D: ABSENTEEISM**

15. What are the causes of absenteeism?

- (a) Weak administration
- (b) Child labor
- (c) Long distances
- (d) Punishments
- (e) Absenteeism of teachers
- (f) Orphanage

16. What are the solutions to the above causes?

- (a) Elimination of punishment
- (b) Establish more schools
- (c) Punishment absent teachers
- (d) Proper teaching methods

17. How are the performances of the absentees

- (a) Excellent
- (b) Very good
- (c) Good
- (d) Bad
- (e) Very bad

18. Performance of those who are always present

- (a) Excellent
- (b) Very Good

19. What is the relationship between absenteeism and academic performance?

(a) Positive

(b) Negative

20. What are your recommendations in the process of stopping absenteeism among children?

.....  
.....  
.....

**THANK                    YOU                    FOR                    YOUR                    COOPERATION**

.....

## APPENDIX II

### BUDGET

The study is estimated to cost 340,000/= arrived at as follows:-

<b>ITEM</b>	<b>Cost (Ugshs)</b>
Stationary and other related	100,000
Transport	80,000
Communication	20,000
Photocopy	50,000
Typesetting and binding	30,000
Internet	15,000
subsistence	25,000
Miscellaneous	20,000
<b>Total</b>	<b>340,000</b>

**APPENDIX III  
8 TIME FRAME**

Activities	Duration (months) year 2018/2019					
	Dec	Jan	Feb	March	April	May
A pilot study						
Study analysis						
Proposal design						
Proposal development						
Submission of proposal for approval						
Final report writing and submission
