

## ABSTRACT

The purpose of the study was to establish the relationship between government supports in the implementation of universal basic education in Rwanda. The objectives to the study were: establish the relationship between financial support from government, to schools and the implementation of universal basic education in Rwanda and to determine the extent of relationship between material support from government and the implementation of universal basic education in Rwanda and establish the relationship between level of legal support and the implementation of universal basic education in Rwanda. A cross-sectional survey research design, simple random and purposive sampling techniques were used to establish the relationship between government support and implementation of universal basic education. Data was analyzed using SPSS's descriptive statistics with, determining frequencies and means of the independent and dependent variables. The findings were that all the three objectives of; establish the relationship between financial support from government, to schools and the implementation of universal basic education in Rwanda and to determine the extent of relationship between material support from government and the implementation of universal basic education in Rwanda and establish the relationship between level of legal support and the implementation of universal basic education in Rwanda , have been implemented . The conclusion was that; male were (52%), below 20 and below years (33%), married (52%) and majority (57%) were residing at school. The objectives of the study were implemented at 2.88 mean for financial support, material support with the mean of 2.80 mean and legal support implemented with the mean of 2.57. Recommendations were made that, there is a need for the management to improve on the working conditions of its employees through provision of all necessary working equipments, leave, good policy governing training and development, and ways of encouraging the employees to feel recognized through participation in management which can lead to their retention.
